EDUCATION

Masters in Data Science, Analytics and Engineering

Arizona State University, Tempe, USA

Aug 2025 - May 2027

4.1/4.0

Coursework: Data Processing at Scale, Analyzing Big Data, Advanced Information Systems Security

Bachelor of Technology in Computer Science and Engineering (Data Science)

Mumbai University, Mumbai, India

Aug 2021 - May 2025

3.3/4.0

Coursework: Machine Learning, Time Series Analysis, Big Data Analytics, Statistics for Data Science, DBMS

SKILLS

Data & Business Analytics: Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Hypothesis Testing, A/B Testing, Statistical Modeling, Regression, Classification, Forecasting, Time Series Analysis, Business Reporting.

Visualization & Reporting: Power BI, Tableau, Excel, Streamlit, Matplotlib, Seaborn, KPI Tracking, Dashboard Development, Drill-up/Drill-down Analytics, Interactive Reporting, Real-Time Analytics.

Databases & Querying: SQL, PostgreSQL, Relational Databases, Data Pipeline Optimization, Data Transformation.

Technical Tools: Python, R, scikit-learn, TensorFlow, PyTorch, Git/GitHub, Docker.

Big Data & Advanced Tools: Apache Spark, Databricks, Kafka, Delta Lake, Apache Airflow, MLflow, Amazon Web Services (AWS), Google Cloud Platform (GCP)

EXPERIENCE

Monkeypatched, Mumbai, India: Data Science Intern

Mar 2025 – Aug 2025

- Designed and deployed automated **data validation dashboards** in Python and SQL to monitor **LLM** response quality across **10K+** responses, boosting output reliability by **25%**.
- Performed **trend analysis and reporting** using Python and SQL, reducing **API** output errors by **30%**.
- Generated actionable **business insights** through **KPI** tracking and dashboard analytics, enabling leadership to make faster **data-driven decisions** and improving operational efficiency by **20%**.

Oasis Infobyte, Mumbai, India: Data Science and Analytics Intern

Feb 2024 – May 2024

- Conducted data cleaning, preprocessing, and feature engineering on **100K+** business records, improving dataset reliability by **25%** and enabling accurate statistical analysis for **business insights**.
- Produced **interactive reports** and **visualizations** in **Tableau**, enabling leadership to monitor **KPIs**.
- Delivered **data-driven insights**, reducing model error rates by **20%** and cutting deployment time by **30%**.

PROJECTS

Global Startup Success Analytics

Apr 2025 – May 2025

- Analyzed **50,000+** global startup records to uncover sector-wise funding patterns, identify **20%** of **high-potential startups**, and extract **actionable insights** for strategic investment decisions.
- Developed **clustering** and **predictive models** to evaluate startup funding likelihood, engineered an **interactive dashboard**, and **forecasted** annual funding trends with **89% accuracy**, supporting data-driven growth planning.

Predictive Analytics & Explainable AI for Telecom Customer Churn

Oct 2024 – Nov 2024

- Conducted **exploratory data analysis** on **5,000+** telecom customer records, identifying **top 10** churn drivers and trends, increasing actionable insights for business teams by **40%**.
- Built **predictive models** using Random Forest, XGBoost, and LightGBM, applied **explainable AI techniques (SHAP and LIME)** to interpret results, and implemented a **Streamlit dashboard** for real-time churn monitoring, helping marketing and retention teams reduce churn risk by **30%**.

Bank Report Dashboard – Power BI

Jan 2024 – Feb 2024

- Formulated and rolled out an interactive **Power BI dashboard** analyzing **50K+ banking transactions**, enabling drill-up/down analytics, automated trend tracking and continuous **KPI** monitoring across departments.
- Optimized **SQL**-based data pipelines, improving **data accuracy by 30%** and reducing reporting time by **25%**.

PUBLICATION

Online Student Learning Experience

Jun 2024 – Apr 2025

Journal of Information Systems Engineering and Management (JISEM), Vol. 10(34s), 2025 - Scopus Indexed.

- Devised a **computer vision pipeline** using Python and OpenCV to process facial expressions, improving student engagement; personally annotated over **1000 images** for training data to improve model.
- Applied **VADER sentiment analysis** on student feedback, achieving **85%** accuracy in engagement classification and ensuring reliable insights for enhancing **online learning** effectiveness.
